Shropshire Paddlesport

Emergency Operating Procedures

The following procedures should be carried out in case of an emergency.

Familiarise yourself with all emergency procedures and the location of marshalling areas, first aid equipment and telephones.

Fire

In case of fire, evacuate / leave the building immediately by the designated emergency exits and do not re-enter the building under any circumstances until advised by the emergency services.

Go to the marshalling area at the double gates along the canal from the club house and report to a club official, coach or responsible person.

Call the emergency services straight away using either a mobile phone or the land line situated at the Queens Head Public House.

Serious Accident / Incident

In case of a serious accident / incident, where possible stay with the injured person(s) removing them from any danger where it's safe to do so without putting yourself or others at risk. Seek out a trained first aider and / or apply First Aid.

Call emergency services as quickly as possible, either yourself or by asking someone. There is a land line at the Queens Head Public House (opposite).
